the Republic of Finland.

Targets of BBC1

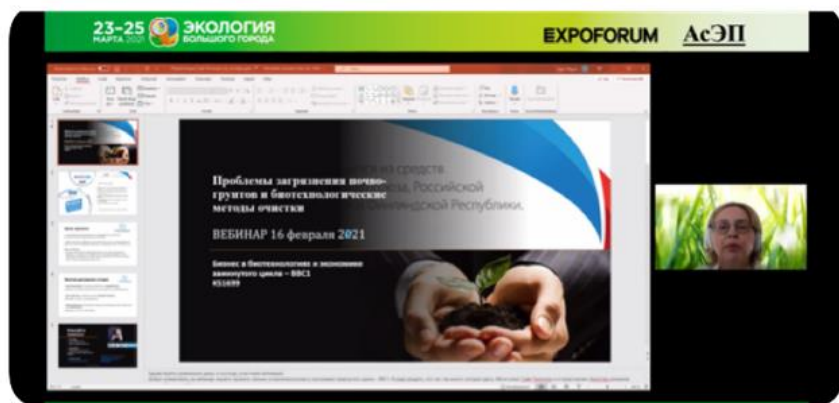

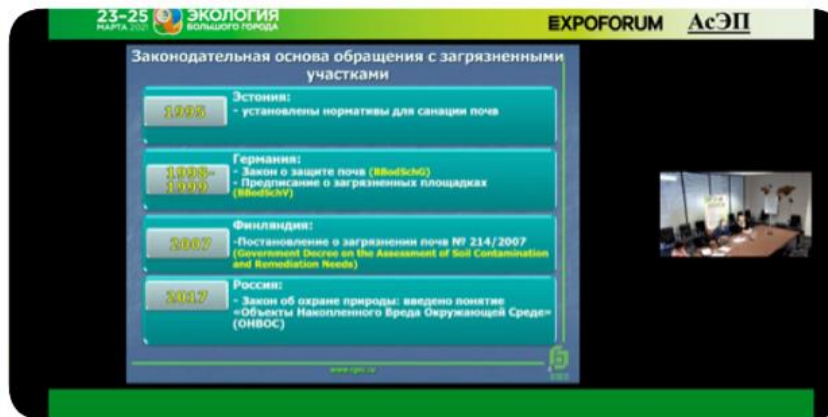

Circular economy and biotechnology on the following industries:

- Waste management
- Waste water treatment and sludge
- Biogas production
- Food industry
- Treatment of contaminated soil.

In BBC1 we are generating new business and providing new business opportunities on cross-border region:

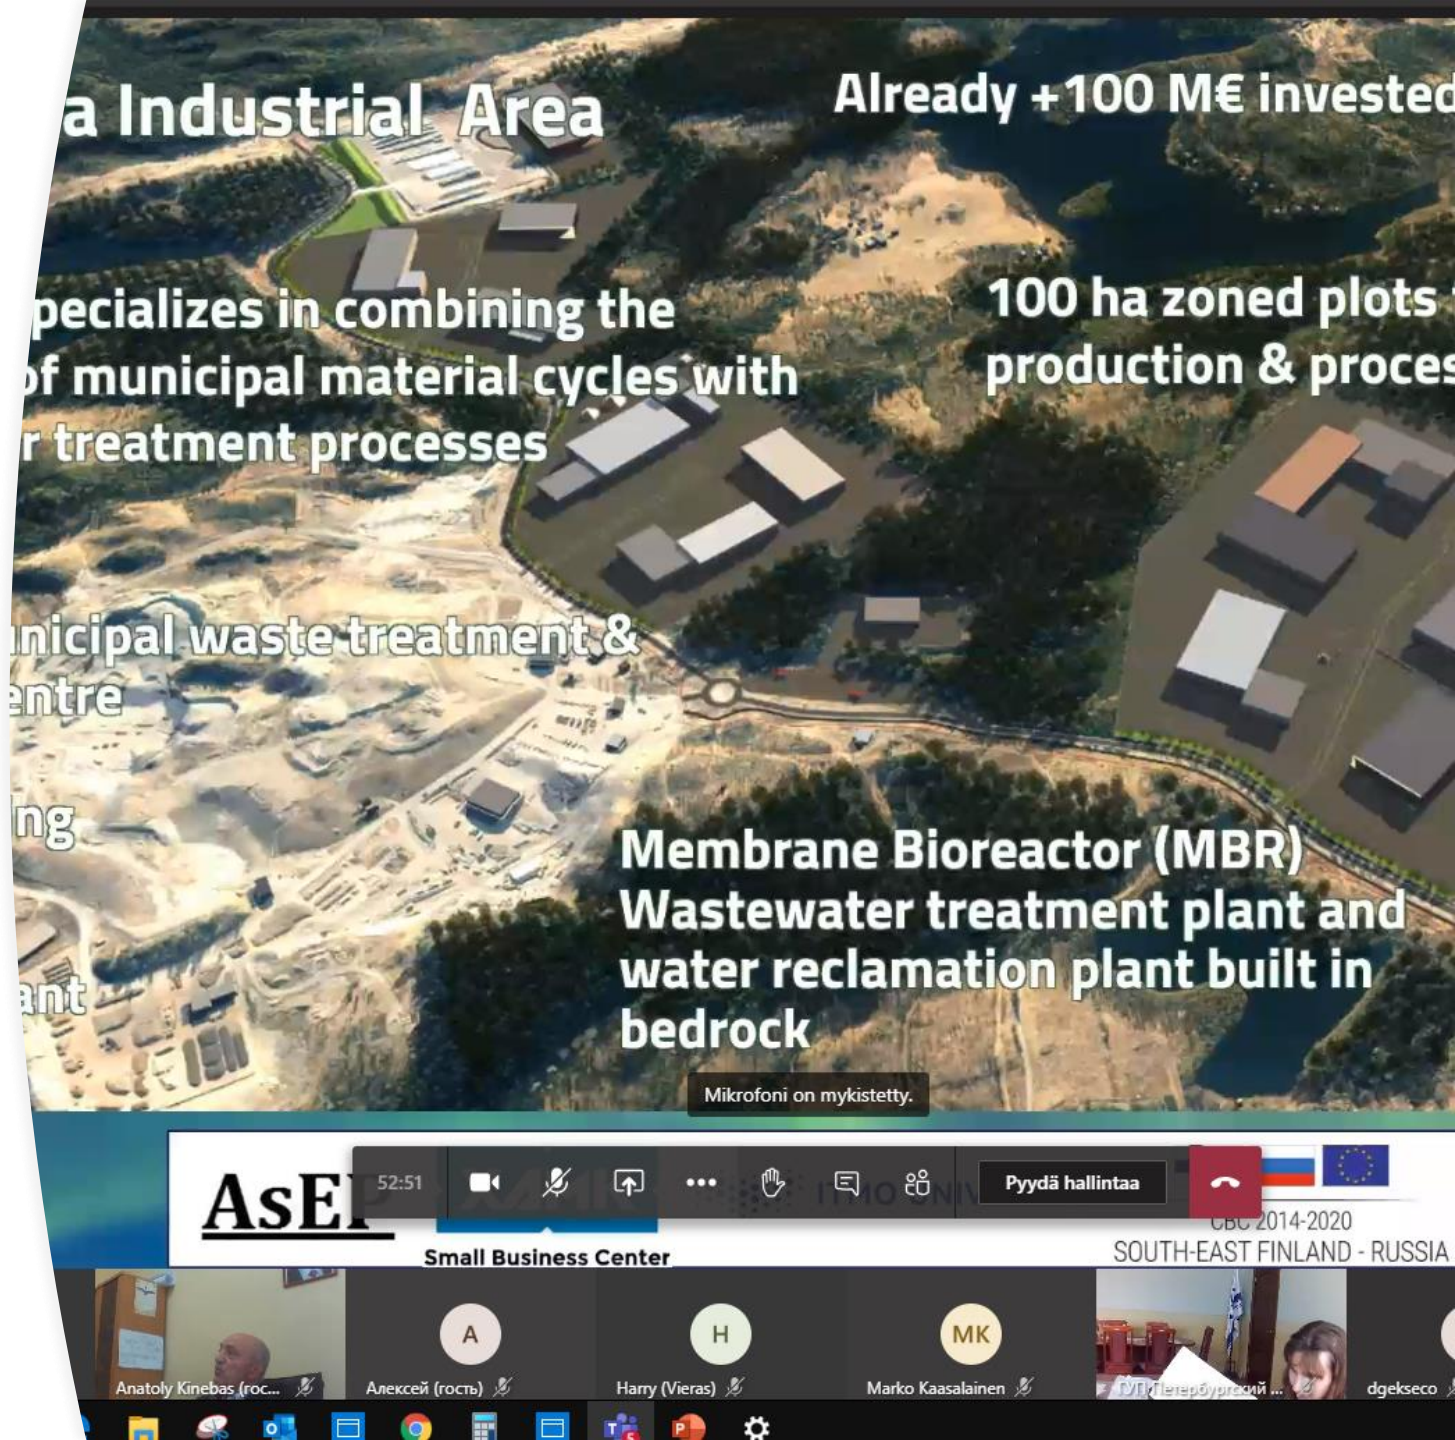

- By offering networks, platforms, events and training
- By sharing up-to-date information and expertise
- By supporting to create new business projects and start-ups
- By offering RDI and testing environment in EcoSairila

Overall we are promoting possibilities of businesses to grow in the field of green technologies.

EcoSairila Innovation platform and industrial area

- BBC1 –project provides EcoSairila platform to be utilized as learning, piloting and testing environment for start-ups and students and for companies to invest in
- EcoSairila is both infrastructure and RDI environment in the city of Mikkeli including new WWTP (started operations in spring 2021), new biogas plant and recycling and waste management center
- Best practices and knowledge within EcoSairila are utilized in BBC1 → EcoSairila has been presented and connected with many project activities for companies, experts and students
- Digital EcoSairila Showroom is developed in the frames of BBC1.
